REFLOW PROFILE

MARKING

Case Sizes: XL, A, AL, B, BL

Case Sizes: C, CL, D, DL, H, Z

Tantalum capacitors are lead-free system compatible system components, meeting the requirements of J-STD-020 standard. Maximum peak temperature 260°C for 10 seconds maximum, 3 reflow cycles.

- There are several important general soldering considerations for tantalum capacitors.
- Soldering temperature and time should be the minimum for a good connection.
 - Recommended soldering profiles are designed to insure that the temperature of the internal construction of the capacitors does not exceed +220°C.
 - Positioning capacitors near components radiating heat such as power transistors should be avoided.
 - Allow for an increase to ESR ratings of 1.25 x catalog limit post PCB assembly.
